TRACK MEET

The Acme-Carbon-Swalwell-Linden Sub-local of the Alberta Teachers' Association sponsored a Track Meet at Acme on Friday May 16th. The Acme Students' Union provided the ribbons, the Carbon Students' Union provided the individual cups, and the A.T.A. Sub-local supplied the buttons.

The weather proved to be most favorable. Carbon athletes dominated the meet. The following competitors won individual buttons:

A Boys—Gregory Remple of Carbon.

A Girls—Carol Wallace, Acme.

B Boys—Millard Evans, Acme.

B Girls—Louise Empey, Swalwell.

C Boys—Barry Stubbart, Carbon.

C Girls—Diane Brost, Carbon.

D Boys—Larry Diede, Carbon.

D Girls—Sharon Tetz, Carbon.

E Boys—Albert Charlebois of Carbon.

E Girls—Dolores Schell, Carbon.

F Boys—Kenneth Brost, Carbon.

F Girls—Mavis Steward, Carbon.

G Boys—Brian Gieck, Linden.

Winner of the individual cup for the girls was Sharon Tetz who won all firsts in her class. The winner for the boys was Barry Stubbart who had five firsts and a third in six events.

Total points for schools were: Acme 436, Carbon 1002, Hesketh 72, Linden 279 and Swalwell 198. No award is made to individual schools since total enrollment and a number of complicated factors are involved. For the future, track records will be kept.

Congratulations to the winners of cups, buttons and ribbons and a thank you to all those who took part.

FISH & GAME NEWS

The Carbon Fish & Game Association held its annual meeting Sat. May 3. The officers for the year are:

President.....Les Bramley
Vice-President.....Wray Wright
Sec.-Treas.....Irvan McCracken
Reporter.....Roland Harsch
Directors—Arthur Hoivik, Ted Schmidt, Wayne Garrett, Leo Ohlhauser, Adam Buyer, G. Eslinger, Morley Buyer, G. Schell.

The first shoot will be held on May 22 with the Trohpy Shoot held on June 19.

The Crow and Magpie Campaign will be carried on this year as usual.

That's all for now, so we'll see you at the first shoot on May 22. More news after the first shoot.

LITTLE LEAGUE BASEBALL

The Carbon Club defended their home game with a fine showing at the bat to trounce Three Hills by a score of 15 to 3. The guns for Carbon were Yogi Stubbart with two homers and a two bagger, Chey Woods with three singles and one round tripper and Ollie Ohlhauser with two singles and a homer on errors. All the other boys seemed to have a little trouble to find the range on the Three Hills moundsmen (Boese and Howe). Two rookie pitchers for Carbon did a fine job of holding the outsiders at bay, but (Irish) O'Rourke had to be relieved by (Flip) Woods who never got into trouble through the balance of the game. The Carbon infield was outstanding in playing heads up ball and made double plays and pickoffs at third.

We have quite a few kids on the farm club and would like to have a little help with them. If anyone is interested please contact old Stub and we'll keep these kids rolling.

Thanks for your support on our first game. Next home game 6:30 sharp May 27th when Swalwell invades Carbon

ANGLICAN GIRLS AUXILIARY

The girls of the Anglican G.A. went to Calgary on May 10th to a rally held at Paget Hall, Calgary accompanied by Rev. and Mrs. J. Roberts. A service in the Cathedral Church of the Redeemer at 11:00 a.m. was followed by lunch and an afternoon of handicraft exhibits, missionary film and talks with some lighter moments. The Carbon exhibits were well appreciated but were nosed out in the matter of awards

The Canadian Legion 161, Carbon played host to the boys and their parents of the Pony League Baseball Team Wed. May 7th. They honored them with a beautiful turkey banquet. The tables were beautifully decorated with flags and looked quite effective. The Parents of the Club, Umpires and wives, Coaches and wives, Managers and wives, Scorekeeper and husband were also guests of the evening. The boys were honored at the head

table with good old faithful Stubby at the head. These boys as you know have won this honor three years in succession and deserve all honors given them. Bernard Stubbart Sr. was M.C. for the evening and called for a toast to the Queen followed by introductions of various officers, etc. Then the M.C. called on Manager Walter Permann, President of 161 to make the presentations of beautiful trophies crests and also the large trophy to be retained now by this team. Their efforts are now well rewarded. The presentation of the large trophy was made to (Feather) Tommy Downes, Captain of the team.

Congratulations boys from one and all of us and good going this season. Make an effort this year Folks to rally around these boys. Some new faces will be among them as older ones move on to senior clubs. We understand this team will play in the Babe Ruth League. We are also pleased to be able to say that bat boy Terry McCracken was well enough to attend and went home with two of everything as (Buck) McCracken had the mumps and was cheated out of the evening. The Ladies Auxiliary 161 to the Legion kindly donated and catered to the supper. The lovely evening closed with The Queen.

The regular meeting of Carbon Home and School was held on May 8th at 8 p.m. The attendance was below average.

The date of the Graduation Banquet was fixed for May 29, 1958. There will be a charge this year for all except graduates and their parents.

Rev. J. Roberts reported on the position of the Library Building and recommended an approach to the Village. It was also decided that the next meeting should be a formal General Meeting to consider the election of directors. The officers have been elected annually but there has been no re-election of Directors as provided in the Constitution. Formal notices will be issued.

The future of the Library Operation was discussed and a full-scale review will take place at the General Meeting.

The program, introduced by Rev. W. Muller, consisted of an interesting and informative address by Mr. C. Blanchard, Drumheller who is the Probation Officer for the Hanna-Irricana area. He emphasized the value of Probation amongst young first offenders and the high percentage of success achieved. His address was followed by a brief discussion and the meeting concluded with lunch.

Don't forget a vote for the Stampede Queen, also the Rodeo Queen.

Rev. and Mrs. Roberts, Jane Roberts, Miss Merry of England, Mrs. Albert Bramley, Mrs. Harry Hunt, Mr. and Mrs. Harry Church, Mrs. W. Church, Mrs. Allen Church motor-

ed to Acme to attend a Missionary evening conducted by the Rev. Nakayama of Calgary.

Bobby Hood of Viking was a weekend visitor at the home of his Scoutmaster Hugh Isaac

BORN—To Mr. and Mrs. Ray Payne (nee Doreen Hay) a daughter May 10th in Edmonton Hospital. Congratulations.

Cpl. J. Graham and family of Calgary were visitors at the home of their parents Mr. and Mrs. C. Graham.

Mr. Steeves is out again after his recent attack of the mumps. It seems several adults have had them so please don't be led astray by the thought it is only a child's ailment.

Hospital patients are Mrs. Cadman, Mayor J. Forsch and Keith Steeves in Drumheller and Doris Bramley in the Calgary General.

Mrs. C. Graham left Sat. for a few weeks at Red Deer owing to the illness of her daughter Mrs. Henry Jerome.

GAMBLE NEWS

Mr. and Mrs. Steve Homeniuk and family were weekend visitors at the home of Mr. and Mrs. Archie Metzger and Mr. and Mrs. J. Metzger.

Don Langley of Kamloops is home again to help with the spring work.

We are glad to report Clyde Anderson is home after having a bout with the 'flu in Three Hills Hospital.

Mr. and Mrs. W. B. McCracken were Rowley visitors on Sunday at the home of the latter's parents Mr. and Mrs. W. Abramenko.

Mumps are still the order of the day. Dale Morgan is the latest patient.

Mr. and Mrs. Pete Johnson were Sundre visitors over the weekend.

Mr. and Mrs. W. Abramenko of Rowley were Tuesday visitors at the home of their daughter and son-in-law Mr. and Mrs. W. B. McCracken.

Mr. and Mrs. Vince Maruzs and baby were weekend visitors at the home of their parents Mr. and Mrs. V. Maruzs and Mr. and Mrs. G. C. McCracken.

Bylaw enforcement demanded

The Local Council of Women has served notice that it intends to take whatever steps are necessary to see that Swift Current's present untidiness in respect to streets, lanes and public places undergoes an improvement. As the situation stands at present, it was pointed out at a meeting of the organization held in the council chamber, they are a disgrace.

Mrs. E. G. Stonehouse, chairman of the LCW's laws committee, gave a detailed report on an investigation carried out by members of her committee in which she branded as a disgrace the untidy condition of the city, generally. Streets and lanes—particularly in the downtown area—are littered with wastepaper and other trash, she said, and public places—including theatres—are little better.

She quoted a city bylaw, passed in 1954, which makes the littering of streets, lanes and public places an offence and provides a penalty of up to \$100, on conviction, or an alternative jail term. The law is there, Mrs. Stonehouse said, but it isn't being enforced. She suggested that the authorities be asked to see that it is, and was instructed to appear before council at its next regular meeting to make the request official. — The Sun, Swift Current, Sask.

Two-mile long freights soon?

One of these days, the many thousands of Canadians who "just like to watch the trains go by" are going to observe a significant milestone in Canadian transportation—the advent of the two-mile long freight train.

Not long ago, the power of the steam engine limited the length of CNR trains to between 100 and 110 cars. At around 40 to 50 feet for each car, the total length of the train was just over the 5,280 feet that is a mile.

Now, however, the power of modern CNR diesel units is such that trains of 125 to 165 cars are quite frequently seen in the West. Longer freight cars are being increasingly used and, with the power of locomotives on the increase, too, it seems likely that freights will reach the two-mile mark in the not-too-distant future.

The inside margin where a book is bound is called the "gutter."

This outfit is a study in blues, rich and vibrant, because both the skirt and the sweater are of 100% wool and wool fibres love dye. Note the unusual cable-like stitch of the raglan shoulder seams, the middy style fit and the short ribbed neckline of the sweater. The widely wrapped skirt is of a blanket plaid in blue that shades from powder to royal with a royal binding.

Royal Commission urges railway, new roads for Alberta Northland

New roads and a railway from McMurray north to Great Slave Lake were recommended to Albertans in a 115-page report by the MacGregor Royal Commission on the province's sparsely-settled northland.

The Commission's report calls for the subsidizing by the province through granting free right-of-way and sharing the \$7,000,000 cost of combined highway-railway bridges over the Peace and Athabasca rivers.

The commission recommends rebuilding of the Mackenzie Highway to better standards and suggests hard surfacing of the portion between Grimshaw and Manning.

The voluminous report says the development of a railway from McMurray to Pine Point, N.W.T., is essential from a defence standpoint. It adds that the volume of freight which can be expected from the Uranium City mining area in northwestern Saskatchewan would tip the scales in favor of the McMurray route—one of 10 considered.

The report says: "The committee's most important conclusions are that northern Canada is general is on the threshold of tremendous development and that the province of Alberta must be prepared to play its full part in that development."

The lengthy commission report covers the area north of the 55th parallel, about 100 miles north of

Edmonton. The area is about 370 miles wide and runs 350 miles to the Northwest Territories boundary—in all, about 129,000 square miles.

Its population in 1956 was 74,000, but growth is rapid, and the figure is expected to reach 270,000 by 1987.—The Lac Ste. Anne Chronicle, Edmonton, Alta.

World population may double within 50 years

"Assuming that we do not commit mass suicide by means of atomic warfare, there will be five billion people on the earth in the year A.D. 2000, as compared with 2½ billion in 1950," claims Prof. F. Baade, a German economist.

The fact that the population of the world may double within 50 years, for the first time in history, poses a problem as well as an opportunity to those interested in reaching people with the printed page.

The Bible Societies, including the British and Foreign Bible Society in Canada, at their present increased rate of production, go less than half-way towards meeting the current growth of the world's population.

Protestant people everywhere are being asked to increase their Bible Society support, to make it possible to provide Scriptures for the millions of new readers who are being added to the world population each year.

Village of Warfield shows surplus

In addition to paying off a 1956 operating deficit of \$8,928.25 the Village of Warfield showed a surplus of \$3,529.72 for last year, it was revealed when the year's financial statement was presented to the Village Commission. — The Miner, Rossland, B.C.

New reservoir being filled

Vegreville's new 100,000,000 gallon water reservoir, constructed last year south of town is being filled with the spring run-off water from the Vermilion River at the rate of 4,000 gallons per minute it was learned. At the time of writing, about 20,000,000 gallons had been pumped into the reservoir and it is expected that 70,000,000 gallons will be pumped in this year. The basin is about 1,500 ft. long, 550 ft. wide and 20 ft. deep. It will not be filled to capacity this year unless the surrounding top bank can be completely covered with the asphalt-fibre glass lining.

In addition to the basin for storing the water, which will hold enough to supply the town for three years in the event that no other water was available, an intricate water treating plant has also been constructed.

In the treating plant the water is to be filtered, chlorinated, aerated, and in general made fit for use. The Observer took advantage of the opportunity to visit the plant with Frank Montgomery, town engineer, and Mr. Montgomery was most co-operative in explaining the complete operation of water purification. We must confess here though that the series of filters, chlorination vats, sludge pits, pumps and the maze of electrical apparatus left us baffled. However, for the benefit of the many householders in town, the Observer did learn that the water will be quite soft for domestic uses but also quite flat for internal purposes.

Cost of the reservoir, plant, land and piping, runs to \$287,000, and ensures the town of plenty of water regardless of the rate of consumption. At present 100,000 gallons a day are used. — The Observer, Vegreville, Alta.

ACCOUNTS FOR ONE-THIRD

Wheat normally accounts for one-third of Canadian railway freight traffic, and by federal law all grain hauled off the prairies for export must be carried at freight rates that applied in 1899.

The flooded Yangtze river in China killed 100,000 in 1911.

YOU CAN SLEEP TO-NIGHT

You can't go ALL-OUT
If you feel ALL-IN
These days most people work under pressure, worry more, sleep less. This strain on body and brain makes physical fitness easier to lose—harder to regain. Today's tense living, lowered resistance, overwork, worry—any of these may affect normal kidney action. When kidneys get out of order, excess acids and wastes remain in the system. Then backache, disturbed rest, that "tired-out" heavy-headed feeling often follow. That's the time to take Dodd's Kidney Pills. Dodd's stimulate the kidneys to normal action. Then you feel better—sleep better—work better. Ask for Dodd's Kidney Pills at any drug counter. 53

Surprise your family with luscious TROPICAL PANCAKES!

(Bake as Waffles, too)
Sift together once, then into bowl,
2 c. once-sifted pastry flour
or 1 1/4 c. once-sifted all-purpose flour
3 tbsps. Magic Baking Powder
1/2 tsp. salt

2 tbsps. granulated sugar
Mix in
1/2 c. chopped pitted dates
1/4 c. chopped nuts

Combine
2 well-beaten eggs
1/4 c. milk
1/2 c. crushed pineapple (drained from a 15-ounce can)

4 tbsps. shortening, melted
1 tsp. vanilla

Make well in dry ingredients; stir in liquids gradually, adding milk, if necessary, to make a medium-thin batter. Bake as pancakes or waffles. Serve with butter and this sauce: Combine in a small saucepan 2 tbsps. flour and 2 tbsps. sugar. Stir in remaining pineapple and juice, 1/2 tsp. vanilla and 1/4 c. water. Cook, stirring, until sauce is smoothly thickened.
Yield—5 or 6 servings.

Your baked goods are so much lighter, so delicious, when you bake with dependable MAGIC! Get MAGIC Baking Powder today!

Mrs. William Suggitt, Baddow, observed 92nd birthday

(By Eva Webster)

Piecing four Dresden Plate quilt tops since harvest time is the remarkable accomplishment of non-agenerian, Mrs. Wm. Suggitt of Baddow, and a firm resolution to finish three more before her 92nd birthday on January 19 is typical of the industry of this woman who bought her first electric sewing machine and mastered the running of it at 86 years of age. She has a record of having made 18 quilts in one year and only two years ago knitted 22 pairs of mittens, a pair for each youngster in the local Sunday School. Fourteen pairs of socks knitted in one year is another of her many industrious feats and at 92 she threads her own needles and sews down her appliques with fine, neat stitches without benefit of eye glasses.

Oh! she does have a pair of glasses for reading but finds if the light falls well over her left shoulder that she can manage without.

She can recount happenings and anecdotes, dating back to the time of Confederation, spiced with chuckles of delight and hearty laughter as the recollection of amusing incidents come to mind.

She recalls vividly riding out to the main road one bright moonlight night for the mail and being accompanied across the breadth of two farms by a lynx which slunk along inside the fence in pace with her horse. Asked if she was frightened she didn't seem to recall that she was. It was a common occurrence for the family to run across a bear while picking berries and it was the part of wisdom to leave quietly when one encountered a cub because that meant the mother bear was nearby and quite apt to resent the presence of anyone near her baby.

Chucklingly she recounted a time when, in company with her brother Bill, they mounted the oxen to take them to pasture in the woods. No lady dared be caught riding straddle so that the ability to ride an ox was made doubly difficult for her. As the oxen broke into a run her brother called to her to hang on and back over 80 years came the memory that there just wasn't any place provided on an ox to get a hold. However, the ride ended happily with the animals stopping abruptly at the water hole for a drink after going over a fence with the young riders still aboard.

As the story of her life unfolded and anecdotes of her forebears were told it was readily understandable that she should be a woman of forthright accomplishment.

Her father, Joseph Eades, came to the Baddow district at the age of 18 to a farm which was one of four which his father had purchased for his four sons. Shortly after his arrival there he fell victim to the dread black measles and returned to Carboro, where he stayed for four months, in that time failing from a hefty 180 lbs. to 80 lbs. in weight.

In 1859 he was in England on a visit when someone, on hearing he was from Canada, gave him a gift to deliver to a friend there, little realizing the tremendous spaces of Canada nor the complete lack of transportation. However, young Joseph took the gift and delivered it near Hamilton where he met the girl, Martha Fielder, who became his wife.

Their honeymoon trip was spent returning to Baddow, the last part of which was crossing Cameron Lake in a boat and walking through the woods to the farm where they established a home in a one-roomed log cabin.

Two sons and two daughters, one of whom became Mrs. Suggitt, were born in this home which was eventually enlarged to accommodate them.

When Mary Elizabeth (Mrs. Suggitt) was two years old the family went to Hamilton, a distance of approximately 130 miles, in a lumber wagon drawn by a sturdy farm team. The trip there and back took two weeks with stop-overs at Scarboro and Millgrove where relatives lived and at road houses between the homes of relatives. This trip was in the way of a real luxury because previously to that the journey was made on foot. Her Grandfather walked from Toronto (Muddy York) and carried the first apple trees ever grown in the Baddow district.

When she was 10 years old the first mail was brought to Baddow,

her uncle, George Eades, carrying it on horseback.

On Christmas Day, 1889, Mary Elizabeth Eades and William Suggitt were married and the gay sprig of holly which topped the wedding cake is still on display among the lovely old dishes so lovingly kept in the sideboard at the farm.

A year later the present house was built and in it Mrs. Suggitt has lived since. Five boys and four girls blessed the union. They are as follows: George of Fenelon Falls; Rev. Joseph of Beachville; Charles of Lindsay; Gordon of Toronto; Melville of Arthur; Mrs. (Rev.) F. Wicks (Martha), Rosenthal; Mrs. Hugh Graham (Jennie), Fenelon Falls, and Miss Gladys Suggitt.

One girl, Charlotte, died at 12 years of age from pneumonia following measles. One daughter, Gladys, lives at and manages the farm.

Besides making quilts and knitting Mrs. Suggitt keeps active in the outdoors all summer. Last year she spaded and tended her own little garden which yielded more strawberries than she could use and three 11 quart baskets of onions among other things.

At Christmas time she took her part in the plucking and preparation for market of some 40 geese and 47 turkeys.

She is alert and keen in all matters respecting the farm and is quick to notice any change in the handling of the farm animals. She recognizes at a glance, the progeny of each beast.

How does it feel to look back 90 years in an era of fabulous advancement in a wonderful country? If you want to know, then ask this sturdy pioneer woman of the Baddow settlement and she will tell you, as clearly as if it were yesterday, stories of life and events beginning in the late 1860's and continuing to the present.

That person whose memory is as keen for present day events as it is for those earlier happenings was 92 years young on Sunday, January 19th, giving her 18 months more of age than the Dominion of Canada. And in all those momentous years she has lived in the district of her birth and been to it a sturdy citizen, devoted to the soil and the outdoors; industrious and contented with the life which is hers.

Members of the Gazette staff interviewed her in her home one week prior to her birthday and found her to be the same delightfully refreshing personality that her anecdotes recall.

Asked what she did with her spare time she replied like the crack of a whip, "Sleep".

As we came out of the comfortable farmhouse into the crisp late afternoon air, the evening star shone brilliantly over the soft, shadowy glow of the sunset and we could not help but compare the brilliancy of the memory of this remarkable person to that star; a memory which glows and commands our wonder and respect in this late afternoon of her life. We could not help but feel that as the night darkens past the rosy and into the smoky shades, that

Chess gains new prestige

Chess tournaments between American and Soviet players are expected to be held this year under terms of the Soviet-American exchange agreement announced in January.

The announcement focused attention on one of the oldest and most widespread of all games, the National Geographic Society says. In some lands, chess masters receive as much adulation as baseball stars in America. And many chess enthusiasts believe the game should be more actively encouraged in American schools to stimulate interest in intellectual activities.

Chess is played in homes, clubs, and parks by people of almost every age. It might even be played by a patient in an iron-lung. Inability to hear or speak is almost an advantage, since conversation during a game is discouraged, when not banned outright.

The game is sometimes played by persons thousands of miles apart who never see each other. Moves are communicated by postcard or telephone. This method has its hazards: One player was reported to the Federal Bureau of Investigation when his building superintendent intercepted a postcard with the spylike message: "Kt-KKt5."

Chess was likely invented in ancient India, possibly by peace-loving Buddhists seeking a substitute for war. From India the game spread to Persia, Arabia, and Europe. The word "chess" came into English, through French and Arabic, from the Persian word "shah" (king). "Check-mate" comes from "shah mat" (the king is dead).

By the 17 century, the last important rules changes had been made. International chess tournaments began in London in 1851. Paul Morphy of New Orleans was the only American ever to hold the championship. Russian players have been champions since 1937.

Chess is fairly easy to learn, but playing well requires much study and practice, since the number of possible variations in play is enormous. Merely the first four moves of a game allow, in theory, some 500 billion different positions, according to one expert. Hence it's easy to understand why Samuel Reshevsky, many times United States champion, says that "a championship match can take as much out of a player as fifteen rounds of boxing."

Napoleon, Benjamin Franklin, Voltaire, and other great men have been chess enthusiasts. In fact, a chess game may have aided in the discovery of America. The story goes that Columbus lost a game to King Ferdinand of Spain. This put the king in such a good mood that he granted Columbus' request to be made admiral and viceroy over all the seas and lands he might discover.

In a letter written in February, 1492, Ferdinand said: "If Cristoval Colon (Christopher Columbus) discovered a new world, as indeed I trust he may, will it not come from the pushing of a Pawn at the proper time?"

An elephant is considered in its infancy until it is 25 years old.

star will remain brilliant and inspiring even unto dark. — The Gazette, Fenelon Falls, Ont.

TURTLE

The word "turtle" was applied to doves long before it was to reptiles. In England it was so used as early as A.D. 1,000.

THERE'S A LIMIT

You cannot make boiling water any hotter by turning up the gas. Water cannot be made hotter than its boiling point.

Hear talk on Africa

On Good Friday afternoon a capacity crowd gathered in LeRoy theatre where Miss Irene Knudsen showed very interesting slides of the missionary work carried on in the Mission Fields of Africa. Miss Knudsen returned from Africa last December where she had worked for a couple of years on these mission fields. The pictures included the mission station at which she was one of the teachers and people with whom she worked. The program was in charge of Pastor O. Lokken who conducted a short service of prayer, hymns and a few words introducing Miss Knudsen.

Miss Knudsen gave a very interesting talk on the work of Foreign Missions in Africa, some of her experiences while there, after which she showed a number of pictures.

Miss Knudsen, being a genuine LeRoyite, born and brought up in the village, and then having gone abroad to serve on foreign fields of dark Africa, made this program all the more interesting to the many friends who attended.

A collection was taken, realizing about \$40.00 which goes to mission work. Miss Knudsen's sojourn in Africa was cut short owing to the fact that she contracted malaria and had to return home. — The Witness, Watson, Sask., April 10, 1958.

CONTRIBUTION UP

In 1957 Canadian employers contributed \$533 million to pensions and welfare, workmen's compensation and unemployment insurance, compared to \$156 million in 1945.

Teen ensemble PRINTED PATTERN

4632 10-16
by Anne Adams

Sew-simple, a teener can make this pretty ensemble all by herself—with a Printed Pattern to help her. The princess dress is perfect for sunning; collarette buttons on, for city wear.

Printed Pattern 4632: Teenage Sizes 10, 12, 14, 16. Size 12 dress requires 5½ yards 35-inch; collarette ¾ yard contrast.

Printed directions on each pattern part. Easier, accurate.

Send forty cents (40c) in coins (stamps cannot be accepted) for this pattern. Please print plainly Size, Number, Address, Style Number.

Send order to:

Canadian Pathologist Studies Rice Disease

More Rice for Asia's Millions

Most of the world's rice, staple diet of Asiatics who comprise almost half of the population of the globe, is raised on terraced, irrigated land such as the one shown above. This field, on the beautiful island of Bali, Indonesia, is

unusual in that it will support 2 crops of rice a year. In most countries it is only possible to harvest one crop a year, and for many years now this single crop has been seriously threatened by a dread disease, *Penyakit merah*.

Now that he has isolated the cause of the disease, Dr. Lockard is working on a series of tests to control the supply of nutrients to his tiny experimental rice-plots. He has devised a dip method of sand culture whereby nutrients can be supplied in regulated quantities.

Dr. Lockard and his American-born wife live in a bungalow on the outskirts of Kuala Lumpur, capital city of Malaya. A Malayan servant brings them glasses of iced tea to break the heat of a warm afternoon. Their hobby is collecting coral.

The family in Malaya is an economic unit and when it is time to harvest the precious rice harvest everyone must help. The cut sheaves balanced by the young boy above will be carried to his village home where they will be threshed later on as the family's needs require. If Dr.

Lockard is successful in his efforts to find a cure for the "Red Disease" as the Malaysians call it, he will have succeeded in raising the standard of living of almost one half of the world's population who depend on rice.

A newspaper three times a month

Last week we asked our readers to watch for an important announcement as to the policy of this newspaper in the future. We have given this matter long and serious thought in an endeavour to figure a way out of a situation getting steadily worse.

Our medical adviser told us over a year ago, during one of the usual periodic check-ups, that there was nothing organically wrong other than "tension", and that we should ease up on the constant grind. This advice has become very evident since last fall.

On top of this, cost of doing business is continually increasing as everyone knows, but there is not always a corresponding increase in business to take care of it. Furthermore, there seems to be an ever increasing amount of work to be done around this newspaper which is not revenue-bearing, so that hiring help (at today's prices) is definitely out.

What we propose to do from here on is to put out three issues of the paper each month: the 10th, the 20th, and the 30th.

This is certainly a departure from a publication each week on Thursday, but we see no other way to handle the situation. We do not think the news matter will suffer any because of the change—in fact we anticipate better news coverage of local events, because we will have a bit more time to round it up personally.

Frequently there are events in the village, very much of local interest, that are never reported. It is a physical impossibility for the editor to attend and report every function or happening which takes place in town; and there is no guarantee anyone else will. With a little more time between issues of the paper, the editor hopes to report local events more fully... and after all, that is what the subscriber is looking for.

We do not propose to change the price of the subscription. As mentioned to begin with, costs of production continue to mount, and we have only increased the price of the paper once in over 21 years—from \$1.50 to \$2.00 per year. We are of the opinion that the subscriber will still get his money's worth each 12 months.

However, in case there are some

who feel they are not getting a fair deal in this matter, we suggest they drop in at the office at any convenient time, and we will cheerfully refund any unused portion of their subscription.

The news correspondents from outlying points have, through the years, been very faithful in reporting events in their particular districts, and we are grateful for their co-operation. We trust they will continue in the future as they have in the past.

Advertising and news reports should be in this office three days prior to publication date, so that space can be arranged for. No guarantee of publication can be given to copy received after the three-day deadline, but we will do our best.

As this is the 10th of April, it is a good place to start from, with our next issue dated April 20th. We will however get the paper in the mail on Saturday, the 19th. Variation in mailing dates can be expected, when publication date falls on Sundays or holidays. One day early in that case.

Well, that's our decision, folks... for better or worse (like getting married!). It will be interesting to see how it works out, and if we know our 3,000-odd readers, we feel they will go along with it, and give the idea a chance.

Thanking you for your consideration in this matter.

—A. T. GEORGE, Editor.
—The Times, Delburne, Alta.,
April 10, 1958.

Mohammedans recite their chief prayer five times daily.

(News of the North, Yellowknife, N.W.T., April 1, 1958)

WINNER OF MARATHON RACE COMES IN—Ray Beck, two-time winner of the Northwest Territories Dog Derby is shown above as he loped across the finish line after a gruelling six hour trip over heavy snow. He was closely followed by Phillip Goulet of Yellowknife, who is thus a repeater for second spot in the Territorial dog team championship. Henry Busse snapped this dramatic picture of Mr. Beck. The race started at a few minutes before eleven on Saturday morning and ended just after five o'clock, taking about an hour longer than a year ago when snow conditions were much better.

Which are you?

A lot of people are like a wheelbarrow—no good unless pushed. Some are like canoes—they have to be paddled.

Some are like kites—if you don't keep a string on them they fly away.

Some are like footballs—you can't tell which way they will bounce next.

Some are like balloons—full of wind and ready to blow up.

Some are like trailers—they have to be pulled.

Some are like a good watch—open faced, pure gold, quietly busy. — The Broadview Express.

Rock and row

Rock and row with sailor boys on guard. Two more children may man the boat with an extra passenger or two and the fun is that much more. Pattern 458, which

PATTERN 458

gives actual-size cutting guides and directions, is 40c. This pattern also is included in packet No. 52 which contains four other patterns for toys and furnishings for tiny tots all for \$1.75.

Consolidation

(The Journal, Emerson, Man.)

This week the school boards of the Emerson Stockport, Manchester, Dufferin and Post Road school districts met to discuss the possibilities of consolidating all their districts in to one. This is not a new problem but one that has been discussed over the years.

However it is likely that this year, definite progress will be made. As stated by the chairman of the Emerson Board, improvements and expansion of the present school plant are not only desirable, they are a must! Our school lags years behind every other public building in the community. Yet is it used by far more people and far more often than any other building. We are now failing to provide our children and our teachers with the bare physical space necessary to a reasonable opportunity to secure an education.

The choice thus facing the people of Emerson and the present closed school districts is not a choice of whether they will pay more school taxes through consolidation. It is whether they will pay more school taxes by consolidation or by building their own schools. The town has no choice. A larger school plant is definitely required. If they have to build alone, they can only provide for the children of ratepayers of their district.

We believe that when the people of our closed schools have fully considered the present position, they will conclude that the only solution is consolidation and the construction of facilities far more suitable than at present available to their children.

We also believe that the inclusion of parts of the Marais and Emerado districts in the consolidation would lead to a lower tax cost over the entire district, and would also be of great benefit to both of these districts.

It is to be hoped that the school boards concerned will do everything in their power to expedite the meetings required to bring about a decision. The need for better school facilities is urgent!

Many things to many people

(The Kennedy Times, Whitewood, Sask.)

This is Red Cross Month—a time of the year when we focus attention on a great international organization.

The importance of the 1958 Canadian Red Cross campaign for funds should be apparent to every citizen of this community and the nation.

The budget of the Red Cross for 1958 is a large one and there is only one source for the money to allow the Canadian Red Cross Society to meet its humanitarian obligations for another year. That money must be provided through the generosity of the people of Canada.

The Canadian Red Cross means many things to many people. In most provinces, the Red Cross means free blood transfusion for everyone. When disaster strikes at home or in any part of the world we know the Red Cross will be on the job doing the things we would like to do if we had the opportunity. In remote areas of our vast land a string of Red Cross Outpost Hospitals and Nursing Stations provide care and treatment.

Through our Red Cross we are assured that our veterans are not forgotten men and women. They receive regular visits, see current movies, enjoy the pleasant atmosphere of Red Cross Lodges and spend hours that would normally hang heavy over their heads in the pleasant pursuit of the Arts and Crafts program.

Through the Junior Red Cross our school children are learning to become better citizens and gaining an understanding of their counterparts throughout the world.

Here in our community the Red Cross means many more acts of kindness and help for our citizens.

This year the Canadian Red Cross will again have increased obligations. An increasing population always presents a challenge for more extensive activities.

One of these days a volunteer canvasser will call on you to request your financial support. Answer that visit with a generous donation and you will have the inner satisfaction of doing your share to help others.

Old fashioned ideas on modern education

(The Canadian, Camrose, Alberta)

We followed the recent conference on education held in Ottawa. Other than to accentuate the educational pressures most of us already knew existed, very little came out of the conference beyond the dedication to set about trying to correct some of our weaknesses. Some of the opinion which came from outside of the conference were very refreshing. There was our own Alberta Judge Nelles Buchanan who advocates the return of discipline to the classrooms even to the point where the teacher concerned can administer punishment when and where necessary without referring the incident to the principal of the school. This ties in with a very unfortunate juvenile delinquency outbreak in Calgary during the week. A bunch of boys were caught siphoning gas from cars and trucks. One of the parents concerned made a violent attack, verbally, on the police for bringing his and the other two boys into court. One trucker who had suffered most, losing gas by the hundreds of gallons was reluctant to lay charges... he had already beaten up on a couple of the lads when he caught them red-handed. The explanation given by the boys was that there was nothing else for them to do, so they just had to have gas to drive around and around. The question arises, how can our educational system meet a situation such as this and spark the ambition of such boys into some useful endeavor.

Week's sew-thrifty PRINTED PATTERN

4654
14½-24½

by Anne Adams

Sew-easy sundress that doubles as a jumper with its smart blouse—fashions that double your wardrobe! It's a Printed Pattern—especially designed to fit and flatter the shorter, fuller figure!

Bursaries available

High school students who want to train for careers in physical or occupational therapy may apply for bursaries offered by the Department of Public Health to assist them in meeting costs of courses, Hon. J. Walter Erb, minister of public health, announced.

Selected high school students, who have completed Grade 12 requirements by the end of the present high school term will be eligible for bursaries; bursaries will consist of a living allowance, tuition, transportation and books. Candidates must commit their services for public health appointments in Saskatchewan for three or four years on completion of training, depending upon the time spent in the approved university program.

Application forms to obtain bursaries are available from the personnel officer of the Department of Public Health, Provincial Health Building, Regina. Candidates will be interviewed by the department's bursary selection committee and final selections will be made shortly after August 1, 1958.

GUESS WHO?

The current issue of Maclean's Magazine has an article on the 1919 Canadian Tour of the (then) Prince of Wales. One of the illustrations caused the remark by a member of the Citizen staff: "I've got my picture in Maclean's!"

At that time, said member was attending MacDonald Institute at Guelph, taking a course in Home Economics. When the Prince visited the Ontario Agricultural College, the MacDonald girls prepared and served lunch to him and his entourage.

The Press pictures taken later were so different from the usual photos showing H.R.H. with guards of honor, V.I.P.'s, etc., that they were widely reproduced, one even appeared in the Illustrated London News.

That, alas, was many years ago, but it constitutes one person's sole claim to fame!—The Citizen, Kipling Sask.

Visit the Tree Planting Car

Meetings are held in the Car at each point on the itinerary, at eight o'clock in the evening. When schools are open, arrangements are made with the school authorities to have the Pupils visit the car during school hours. Sound films show the results obtained by farming people through planting trees, and give practical instruc-

The new Unity Veterinarian Clinic

New veterinarian clinic ready for use in Unity

A notice under "Birth Announcements" in the Unity Herald at the end of March might have read something like this:

"Born to Bossie, a bovine resident of the Ben Kletzel farm, on March 25, 1958, a daughter, by caesarian section. Attending physician, Dr. J. C. McIsaac. Place of birth, the 'Animal Clinic in Unity.'"

The foregoing occasion marked the beginning of a venture that may well prove to be one of the biggest assets of the progressive community of Unity, Sask., or at least to the farmers within a 50-mile radius who have need of veterinary services under the most modern facilities.

The animal clinic is a dream that has turned into a reality for 27-year-old 'Doc' McIsaac, a native of P.E.I. He arrived in Unity in June, 1955, having completed seven years of university, graduating from a two-year course at the Agricultural College of Nova Scotia at Truro in 1950, followed by five years of veterinary courses and a diploma from the University of Toronto at Guelph, Ont.

Cliff McIsaac got right down to work when he arrived in Unity and soon had an extensive prac-

tice. He turned the garage of his home into a temporary clinic for small animals, but he soon realized he was spending much time travelling from one case to another and his number of calls was necessarily limited. The idea was born to build a clinic that could handle many of his large animal cases, so that sick animals could come to him, instead of his going to them.

"It's no different than a medical clinic," said the veterinarian. "The days of travelling from house to house making calls has practically disappeared. Minor cases are treated at the clinic and very sick ones go to hospital."

Dr. McIsaac's hospital is as sanitary and practical as modern methods of building and design can devise. The 50x28 foot building, erected at a cost of \$10,000 as it stands at present, is located at the north end of Main Street, just over the boundary into the municipality of Round Valley. From the outside its appearance is deceiving, as it looks more like a modern residence than the old idea of a barn.

Inside the front entrance is a reception office, paneled in grained wood, with cabinets and counter to ensure a methodical office routine. Behind the office is the dispensary, stocked with all the medicines that modern farming practice demands. Cleanliness throughout the building is a major factor, "in fact", admitted Dr. McIsaac, "it's one of the biggest chores, but this place will be kept as clean as any house... or perhaps cleaner. I employ a full-time attendant, and one of his jobs is to keep the place disinfected at all times."

The centre room, running the full width of the building is the treatment room, with a door that is high and wide enough to allow a truck to enter right into the building. In that way, explained the veterinarian, a sick animal can be treated right in the truck, if necessary, or transferred to the portable chute under restraint. "I can take that chute with me on calls, too," he added. A scrub sink and cupboards of gleaming instruments give the impression of an operating theatre, and, as "Doc" puts it "That's just what it is."

The end room might well be called the convalescent quarters. There kennels for small animals and stalls for cattle or horses. Again, animals can be brought in or taken out direct from the stalls through doors built for the purpose, which lead to an outdoor loading chute.

"In this way I can keep an eye on animals that need special care for a period of time," said the doctor. "Say I have a cow with a broken leg. If it's on a farm, it means I have to call there every other day until it is recovered, but here I can keep a check on several cases at once, and have instruments and medicine right at hand for an emergency."

This summer Dr. McIsaac plans to build a fence around the property and make corrals for animals that can remain outside but still require further observation. An incinerator is another necessity that will be installed shortly, as Dr. McIsaac expects farmers to make use of his post-mortem services and the disposal of dead animals has always been a problem. He said that the spread of infection in a herd of cattle or pigs, or a flock of chickens, can, in most cases, be avoided if an early diagnosis of the disease is made by post-mortem examination.

The idea of an animal clinic is not new by any means, but this is the first one to be built primarily for large animals in the

HEY, HOW ABOUT THAT!

As Hayloft Hannah was heard to say: "When a gal is trying to catch a husband she should make like a fisherman—wriggle the bait once in a while."—The News-

Optimist, North Battleford, Sask. western provinces. Dr. McIsaac said he knows of several that have developed from kennels originally designed for domestic animals, but they do not have the facilities that the well-planned clinic in Unity provides. There are numerous similar clinics in the mid-western United States, and farmers there have unanimously bated them a necessity and immense benefit in these days of modern farm practice.

Summing up his aims for the future operations of the clinic, Dr. McIsaac had this to say, "Fifty percent of my cases are

not transportable, and I expect to make those calls, but it's the other 50 percent I would like to see at the clinic. So far I keep Tuesday and Saturday afternoons free to see cases at the clinic, but I hope to be able to spend more time there in the future. It may take a bit of education for this idea to catch on," the doctor said, "but I think the farmers will see the benefit of it after a while." In time, he'll no more think of calling the vet 20 miles out of town to see his sick cow than he would think of sending for a mechanic to fix a part on his combine. It's all a matter of concentrating service where it will do the most good for the most people," the doctor concluded. — The Herald, Unity, Sask., April 9, 1958.

Tours of district farms are planned

A series of three tours have been arranged by district agriculturist Walter McNary for livestock breeders and feeders interested in seeing new developments in the various livestock fields.

First of these tours will be undertaken next Tuesday when district swine farms will be visited to inspect new buildings, new ideas and a new concept of feeder-pig housing. This tour will start from the district agriculturist's office at 10:00 a.m. on April 15.

A dairy farm tour is planned for Friday, April 18. Those joining this tour will have an opportunity to inspect farms with stanchion systems, loose-housing systems, new barns and where new silage practices are carried out. The tour will start at 10:00 a.m. from the district agriculturist's office here.

Next tour in the series-of-three will be for beef feeders, to be held on Wednesday, April 23, starting at 10:00 a.m. This tour will demonstrate how different silage and dry feeding systems are used by different feeders in this area.

"We hope that farmers will take advantage of these tours," Mr. McNary told The Globe. "Anyone that is looking for ideas in building or in feeding systems is particularly encouraged to take in one or more of the tours. Experience of others can save both time and money in planning of new systems in individual farms," he emphasized. — The Globe, Lacombe, Alta., April 10, 1958.

Deer family rescued from lake

A family of three deer were rescued from the waters of Sonder Lake after breaking through the ice, near the Sam Shaver farm. After extensive massaging of the limbs, by Phil Sweeting, deputy game guardian, one animal was able to leave on its own.

The fawn died shortly after being rescued from the water—the third animal was taken to the Shaver barn and kept there all night. By morning it was well enough to be turned loose to join its mate.—The Sun, Swift Current, Sask.

Nicaragua is the largest of the Central or Middle America states.

HIS FAVORITE FAN—Murray Massier, formerly Regina Pat centre, found his favorite fan waiting Sunday when the Denver University hockey team returned home after winning the national hockey championship Saturday night in Minneapolis. Massier was the hero of DU's 6-2 win Saturday night and also was acclaimed the tournament's most valuable player. A bit misty-eyed, Massier's wife, Ellen, was one of the first to break through the cordon and greet her sick-skating husband.

—Virden Empire-Advance Staff photos.

CURLING OR CARPENTERING—It's all the same to members of Virden Curling Club and many others these days. Plans for a new curling rink are fast becoming a reality and volunteer workmen are turning out in large numbers to speed along the construction work. In the picture the sections of a laminated wood rafter have just been assembled. Six husky curler-carpenters are carrying it to be stacked ready for erection. W. C. Tapp is putting the finishing touches to another rafter assembly.

The Weeklies Say

(The Record, Rimbey, Alberta, April 9, 1958)

HISTORICAL EXPORT

History will be made this summer when the firm of B. B. Warnica and son of Painswick ships 16 head of polled or hornless purebred Hereford cattle to England. It will mark the first time that England, traditionally the home of top quality cattle breeding, has imported Hereford cattle from Canada.

—Barrie, Ont., Examiner.

RIOTUS COLOR

Now it is petunia time in and around Brighton. In most every garden there is a riot of color, with petunias in full bloom in every shade of pink, blue, and some striped. These small flowers make a wonderful showing, especially as a border.

—Trenton, Ont., Trentonian.

PATIENCE

Fishing is fascinating, and could be fun, too, if the darn fish would only co-operate. . . . Bosses must co-operate, too, for fish often bite better during the week than on weekends.

—Stanstead, Que., Journal.

And he wasn't dreaming, either

Did you feel a tremour about 4:30 Monday morning? A steady distant rumbling (much the same as thunder) which lasted some 10 or 15 seconds? Rolf Hadland did and naturally he would like some support, just to convince his friends that he was not dreaming.

Rolf, who farms four miles north of Weldon, was awakened by the rumbling and, looking out the window saw the light lead-in wires bouncing up and down—but there was no wind. The rumbling was quite loud, Rolf stated, and continued longer than thunder would have. The wires stopped their vibration soon after the sound ceased.

Mr. Hadland listened to the early morning news for some explanation but received none. However on a later news cast he heard of the earthquake in Alaska which took place just at this time, and which was recorded on seismograph instruments as far east as Montreal. Evidently it was this that awoke Rolf, but what he can't figure out is why it was not more generally heard! Perhaps we're just a bunch of sleepyheads!

—The Post, Kihistino, Sask., April 9, 1958.

There are about 20,000 species of birds in the world.

New curling rink well under way

Virden Curling Club's new rink is fast becoming a reality. Crews of volunteer workmen have been working early and late during the past week doing their best to get the building completed in as short a time as possible.

The building, located on the grounds of Virden Agricultural and Recreational Centre, will have an overall length of 177 feet and will be 63 feet wide. The ice surface area is 150 feet in length and wide enough to accommodate four standard curling sheets. The main structure is constructed of laminated wood rafters, 76 in all, covered with wooden sheathing and asphalt shingles.

An ultra-modern waiting room, built from concrete blocks will be located at the northeast end of the main structure. It will include a basement, a main floor and a second floor. The basement will house the heating system, lockers and rest-room facilities and will include space for future installation of an artificial ice plant. The main floor will include a general waiting-room, office, rest-rooms, kitchen and lunch counter, and spectator accommodation. The second floor will have a members' lounge, spectator space and rest rooms.

Supervising the construction is Charlie Bryant of Miniota. W. C. Tapp is in charge of directing volunteer workers, assigning them to specific jobs. Several members of the staff of Dring Laminated

Structures of Boissevain were on hand to oversee the assembly and erection of the wooden rafters.

In addition to Curling Club members who are helping with the construction, there are members of Virden Agricultural Society, Virden Collegiate and many other interested individuals making up the crews of volunteer workmen.

Members of Virden Ladies' Curling Club are contributing to the effort by providing coffee and doughnuts for the curler-carpenters.

Actual work on the building began last fall when the concrete foundations for the rink and waiting rooms were poured. Last Wednesday the job of fabricating the wood rafters was begun. On Monday the rafters were set in place in a working time of less than five hours. By Tuesday evening the extra studding and rafters for the walls had been put into place the walls sheathed in and the roof half covered with wood sheathing. The builders expect that most of the outside construction will be finished by the end of this week.

CHIMP IS CHAMP

Scientists say that of all the creatures in the animal kingdom, the chimpanzee is the champion in intelligence. The lowest of intelligence are the horse and the dog.

Vimy Ridge anniversary commemorated

Yesterday was the 41st Anniversary of the Battle of Vimy Ridge and the occasion was remembered by World War One veterans as they gathered at Legion headquarters to mark the occasion and to be guests of the Revelstoke branch of the Canadian Legion.

The annual affair, launched some years ago by the Legion branch, brought together members of the thinning ranks of the veterans of almost half a century ago and they enjoyed to the full reliving old experiences, singing the old songs and the excellent turkey dinner, with all the courses prepared and served by the Women's Auxiliary.

Prior to the banquet veterans paraded in solemn procession to the Cenotaph where wreaths were deposited in memory of fallen comrades. Frank Romeo, past president, officiated. A feature was the sounding of the Last Post and Reveille by Art Townsend.

At the banquet, Ben Nelson was master of ceremonies and once again demonstrated his ability to keep a program moving in rapid and interesting fashion. He welcomed the veterans in appropriate language and recalled memories of 41 years ago.

A brief silence in memory of three members who passed away during the year was observed.—The Review, Revelstoke, B.C., April 10, 1958.

Former Unity youth wins Canada council award

Mike Wiseman, of the Queens-ton district, has learned that his son, James, (Morley) is one of the 44 Canadians to be awarded a grant from the Canada Council to further his studies.

Morley is at present studying ballet in England at the Royal Ballet Academy in London. Last summer he was with the Rainbow Theatre Group in Winnipeg.

Mr. Wiseman does not know the amount of the award as he has not heard about it from his son yet. Awards range from \$300 to \$2,000.

Another recipient of an award, who is well-known in Unity and is married to the former Sylvia Stuart, is Boyd McDonald, pianist. Boyd and Sylvia are at present in Paris, France, where Boyd is studying composition.—The Herald, Unity, Sask.

every fourth day a child is killed

Last year 90 children lost their lives in Saskatchewan accidents. Every year 2,000 children under 15 go to early graves because of accidents.

This is a tragic burden of sorrow and loss which no public health agency can change without the wholehearted participation of the public. The crusade for children's safety needs you and your community organizations. Plan now for local observance of

So good

Here's bread with a tasty difference! Dependable Fleischmann's Active Dry Yeast makes it quick and easy!

Rolled-oat Bread

1. Measure into bowl
1 cup rolled oats
2 teaspoons salt
1½ tablespoons shortening

Stir in

- 1¾ cups boiling water and let stand until lukewarm.

2. In the meantime, measure into a large bowl

- ½ cup lukewarm water
2 teaspoons granulated sugar

and stir until sugar is dissolved. Sprinkle with contents of

- 2 envelopes Fleischmann's Active Dry Yeast

Let stand 10 minutes, THEN stir well. Stir in prepared rolled oat mixture and

- ¾ cup lightly-packed brown sugar
2 tablespoons molasses
2 cups once-sifted all-purpose flour

and beat until smooth and elastic. Work in an additional

- 2½ cups (about) once-sifted all-purpose flour

3. Turn out on lightly-floured board and knead until smooth and elastic; place in greased bowl. Brush top of dough with melted shortening. Cover. Let rise in warm place, free from draft, until doubled in bulk—about 1 hour.

4. Punch down dough. Turn out and divide in half. Let rest 15 minutes, then shape each half into a loaf. Place in greased loaf pans (8½ x 4½ inches, top inside measure). Brush with melted butter, margarine or shortening. Cover. Let rise until doubled in bulk—about 45 minutes. Bake in moderately hot oven, 375°, about 50 minutes. Yield: 2 loaves.

OUR AGRICULTURAL SOCIETY

For many years the man who became our fourth president has been an outstanding practical farmer, stockman & showman. P. J. Rock has scored notably as a grower of top quality seed grain, he is known as a breeder of Suffolk sheep wherever the breed is known, his Shorthorn cattle have been entered in the toughest kind of competition. As far as young people's work is concerned Mr. Rock had played an important part in organizing and directing the Calf

Snow and Sale a few years before the society was organized. After organization of the society he was a consistent supporter of the show and made many helpful contributions to its general performance. Mr. Rock's interests and enthusiasms have taken him to many of the greater shows on the continent—to Utah and Texas, to Toronto and Chicago and elsewhere. Given such a background and such an outlook it was altogether fitting that his first year as president, 1954, should see our society splendidly represented in the Calgary Stampede.

The float prepared for entry was in every way worthy of our society. Prominently displayed on its sides was the 4-H motto "learn to do by doing". The whole emphasis of our entry was on the young people within our circle who had scored so notably up to that time—provincial plot champions, world wheat kings, Toronto champions and so on—a combination of achievement from one district which would be difficult to match anywhere. When on the big day the score had been tallied, our entry was rated second in the class in which it was entered. By entering in Calgary at such a time our society had thrown its gauntlet into still another field of competition and in the showdown had scored quite notably.

One development in this district and in the province as a whole bears the stamp of P. J. Rock—vaccination of heifers for brucellosis control. In 1950 when he was chairman of the Bang's committee of the National Council of Canadian Beef Producers, his report delivered on January 15th of that year, gave a comprehensive report on the findings on brucellosis vaccination to that time. He reviewed the picture in its broadest light, making reference to work done at Ottawa, at Agassiz, at Lacombe and elsewhere. In conclusion he came out overwhelmingly in favor of a campaign to vaccinate heifers of the right age. It is now interesting to note that 1950 was the first year for the first area in Canada to be declared Bang's restricted. It is even more interesting to note that the area so chosen is within the district served by our society, Starland municipality. By the time Mr. Rock had become president of our society he had the satisfaction of seeing several areas within the province designated as Bang's restricted. Today as he looks out he beholds a province in which a traveller may go from the Peace River district to the American Boundary

and never leave Bang's restricted territory.

These developments apart, Mr. Rock's terms as president were notable in their own right. It was in 1955 that Jerry Leiske's wheat sample went to

Chicago for the first time and came out in first place—how proud we were. Further, 1954 was the year that the Adam Buyer family of Carbon won the Master Farm Family award and in so doing repeated a performance which had been one of the experiences of other members of our society in former years.

In the world of the calf show, grain competition, showmanship and all around performance our society scored notably under the guiding hand of our fourth president.

Some of our major achievements will always be associated with the name and time of P. J. Rock.
